Step-by-step guide

Note You can use an FTP-client such as WinSCP, but preferably you use WebDrive to connect to your personal website on the Linux-server.

1 - Using WebDrive to access your personal website

- Start WebDrive from the Start-menu.
- Add a new connection by clicking New
- In the next screen, click SFTP and then click Next

🔡 WebDrive			
New	App Settings	(Q) Backup	Site Propertie:
Server Lis	t		
Search Serve	er List		Q

On the next page enter the following information:

- Url / Address: sftp.data.vu.nl
- Username: <your VU-net-ID>
- Password: <your VU-net-ID password>

Next, press Advanced Settings

• Under General Settings, click on **Connection Settings** a nd type for the **Command timeout (seconds)**: 120

Click on SFTP Settings and type the following path in the Root Directory section:

- For your <u>personal</u> homepage:
 - /mnt/personal/few/<YourFormerFEWLoginNa me>
 - or • /mnt/personal/falw/<YourFormerFALWLoginN ame>

<u>Note</u>: Your Login Name might be either your **VU-net-ID** or your **UnixLoginName** from before the migration

- For your group homepage:
 - /mnt/group/<YourGroupSite>

- On the bottom left click on the tab **Basic Cache Settings** . Perform the following steps (in order):
- 1. Turn off the checkbox Inherit global cache settings
- 2. Set the Cache Mode to Custom
- 3. Check **all checkboxes** such that they are all checked. The number values can remain at their default value
- 4. Click OK
- 5. Click Next

- On the next screen you can choose a **name** for the connection, such as "FEW/FALW website".
- Next, pick an unused **drive letter** to which the connection will be linked. If you wish to automatically connect when you log in to your computer, check the checkbox **Connec t** at login/startup
- Finally, press Finish

Webdrive is now setup to connect to your FEW/FALW website files

- Go to Windows Explorer and go to your chosen path
 Start editing index.htm by doubleclicking. If there is no index.htm, make a text file and save this under the name index.htm
- Go to http://www.few.vu.nl/~YourFormerFEWLoginNa me>/ or http://www.falw.vu/~YourFormerFALWLoginN ame>/ to see the results

Note: Your FormerLoginName might be either your VU-n et-ID or your UnixLoginName from before the migration
