

## LIST OF PUBLICATIONS

### research monographs

1. J. J. Dijkstra, *Fake Topological Hilbert Spaces and Characterizations of Dimension in Terms of Negligibility*, CWI Tract 2, Centre for Math. and Comp. Sci., Amsterdam, 1984.
2. J. J. Dijkstra and J. van Mill, *Erdős space and Homeomorphism Groups of Manifolds*, Mem. Amer. Math. Soc. **209** (2010), nr. 979, vi+62 pp.

### research papers in refereed journals

3. J. J. Dijkstra and W. A. van Leeuwen, *Mathematical aspects of relativistic kinetic theory*, Phys. A **90** (1978), 450–486.
4. J. J. Dijkstra, *Mathematical aspects of relativistic kinetic theory II. The summational invariants*, Nederl. Akad. Wetensch. Proc. Ser. B **81** (1978), 465–489.
5. J. J. Dijkstra, *A space with maximal discrepancy between its Katětov and covering dimension*, Topology Appl. **12** (1981), 45–48.
6. J. J. Dijkstra, *A generalization of the Sierpiński Theorem*, Proc. Amer. Math. Soc. **91** (1984), 143–146.
7. J. J. Dijkstra, *A sufficient condition for the compactness of integral operators*, Indag. Math. **46** (1984), 387–390.
8. P. Borst and J. J. Dijkstra, *Essential mappings and transfinite dimension*, Fund. Math. **125** (1985), 41–45.
9. J. J. Dijkstra, *A rigid space whose square is the Hilbert space*, Proc. Amer. Math. Soc. **93** (1985), 118–120.
10. J. J. Dijkstra,  *$k$ -Dimensional skeletoids in  $\mathbb{R}^n$  and the Hilbert cube*, Topology Appl. **19** (1985), 13–28.
11. J. J. Dijkstra, T. Grilliot, D. Lutzer, and J. van Mill, *Function spaces of low Borel complexity*, Proc. Amer. Math. Soc. **94** (1985), 703–710.
12. J. J. Dijkstra and J. van Mill, *Fake topological Hilbert spaces and characterizations of dimension in terms of negligibility*, Fund. Math. **125** (1985), 143–153.
13. J. J. Dijkstra, *Boundary set imbeddings in the Hilbert cube*, Topology Appl. **21** (1985), 137–140.
14. J. J. Dijkstra, *A rigid imbedding of the Hilbert space in the Hilbert cube*, Bull. Polish Acad. Sci. Math. **34** (1986), 225–229.
15. J. J. Dijkstra, *Strong negligibility of  $\sigma$ -compacta does not characterize Hilbert space*, Pacific J. Math. **127** (1987), 19–30.

LIST OF PUBLICATIONS

16. J. J. Dijkstra, *Strongly negligible sets outside Fréchet manifolds*, Bull. London Math. Soc. **19** (1987), 371–377.
17. J. J. Dijkstra, T. Dobrowolski, W. Marciszewski, J. van Mill, and J. Mogilski, *Recent classification and characterization results in geometric topology*, Bull. Amer. Math. Soc. (N. S.) **22** (1990), 277–283.
18. J. J. Dijkstra, *Characterizing Hilbert space topology in terms of strong negligibility*, Compositio Math. **75** (1990), 299–306.
19. J. J. Dijkstra and J. Mogilski, *The topological product structure of systems of Lebesgue spaces*, Math. Ann. **290** (1991), 527–543.
20. J. J. Dijkstra and J. van Mill, *Stability of a fake topological Hilbert space*, Rocky Mountain J. Math. **21** (1991), 1225–1234.
21. J. J. Dijkstra and J. Mogilski,  *$C_p(X)$ -representation of certain Borel absorbers*, Topology Proc. **16** (1991), 29–39.
22. J. J. Dijkstra, J. van Mill, and J. Mogilski, *An AR-map whose range is more infinite-dimensional than its domain*, Proc. Amer. Math. Soc. **114** (1992), 279–285.
23. J. J. Dijkstra, J. van Mill, and J. Mogilski, *The space of infinite-dimensional compacta and other topological copies of  $(l_{\mathbb{F}}^2)^{\omega}$* , Pacific J. Math. **152** (1992), 255–273.
24. J. J. Dijkstra, J. van Mill, and J. Mogilski, *Classification of finite-dimensional universal pseudo-boundaries and pseudo-interiors*, Trans. Amer. Math. Soc. **332** (1992), 693–709.
25. J. J. Dijkstra, *A dimension raising hereditary shape equivalence*, Fund. Math. **149** (1996), 265–274.
26. J. J. Dijkstra and J. van Mill, *On the dimension of Hilbert space remainders*, Proc. Amer. Math. Soc. **124** (1996), 3261–3263.
27. J. J. Dijkstra and J. van Mill, *On remainders without arcs*, Bull. Polish Acad. Sci. Math. **44** (1996), 263–266.
28. J. J. Dijkstra and J. Mogilski, *The ambient homeomorphy of certain function and sequence spaces*, Comment. Math. Univ. Carolin. **37** (1996), 595–611.
29. J. J. Dijkstra and J. van Mill, *Groups without convergent sequences*, Topology Appl. **74** (1996), 275–282.
30. J. J. Dijkstra and J. van Mill, *Two point set extensions – a counterexample*, Proc. Amer. Math. Soc. **125** (1997), 2501–2502.
31. J. J. Dijkstra and J. van Mill, *Projections of planar Cantor sets in Potential Theory*, Indag. Math. (N. S.) **8** (1997), 173–180.
32. J. J. Dijkstra and J. Mogilski, *Countable dimensionality and dimension raising cell-like maps*, Topology Appl. **80** (1997), 73–79.

## LIST OF PUBLICATIONS

33. J. J. Dijkstra, K. Kunen, and J. van Mill, *Hausdorff measures and two point set extensions*, *Fund. Math.* **157** (1998), 43–60.
34. J. J. Dijkstra and J. van Mill, *Extending monotone mappings*, *Colloq. Math.* **77** (1998), 201–210.
35. J. J. Dijkstra, *Generic partial two-point sets are extendable*, *Canad. Math. Bull.* **42** (1999), 46–51.
36. J. J. Dijkstra, T. L. Goodsell, and D. G. Wright, *On compacta with convex projections*, *Topology Appl.* **94** (1999), 67–74.
37. S. Barov and J. J. Dijkstra, *More on compacta with convex projections*, *Real Anal. Exchange* **26** (2000/01), 277–284.
38. J. J. Dijkstra, *A four-point set that cannot be split*, *Amer. Math. Monthly* **108** (2001), 168–170.
39. K. Bouhjar, J. J. Dijkstra, and J. van Mill, *Three-point sets*, *Topology Appl.* **112** (2001), 215–227.
40. K. Bouhjar, J. J. Dijkstra, and R. D. Mauldin, *No  $n$ -point set is  $\sigma$ -compact*, *Proc. Amer. Math. Soc.* **129** (2001), 621–622.
41. S. Barov and J. J. Dijkstra, *On boundary avoiding selections and some extension theorems*, *Pacific J. Math.* **203** (2002), 79–87.
42. J. J. Dijkstra and J. van Mill, *Topological equivalence of discontinuous norms*, *Israel J. Math.* **128** (2002), 177–196.
43. J. J. Dijkstra and J. van Mill, *On sets that meet every hyperplane in  $n$ -space in at most  $n$  points*, *Bull. London Math. Soc.* **34** (2002), 361–368.
44. S. Barov, J. Cobb, and J. J. Dijkstra, *On closed sets with convex projections*, *J. London Math. Soc.* **65** (2002), 154–166.
45. K. Bouhjar and J. J. Dijkstra, *On the structure of  $n$ -point sets*, *Israel J. Math.* **137** (2003), 321–354.
46. J. J. Dijkstra and J. van Mill, *Homeomorphism groups of manifolds and Erdős space*, *Electron. Res. Announc. Amer. Math. Soc.* **10** (2004), 29–38.
47. J. J. Dijkstra, J. van Mill, and J. Steprāns, *Complete Erdős space is unstable*, *Math. Proc. Cambridge Philos. Soc.* **137** (2004), 465–473.
48. J. J. Dijkstra, *On homeomorphism groups of Menger continua*, *Trans. Amer. Math. Soc.* **357** (2005), 2665–2679.
49. M. Abry and J. J. Dijkstra, *On topological Kadec norms*, *Math. Ann.* **332** (2005), 759–765.
50. M. Abry, J. J. Dijkstra, and J. van Mill, *Sums of almost zero-dimensional spaces*, *Topology Proc.* **29** (2005), 1–12.
51. J. J. Dijkstra, *A criterion for Erdős spaces*, *Proc. Edinburgh Math. Soc.* **48** (2005), 595–601.

LIST OF PUBLICATIONS

52. J. J. Dijkstra, *On homeomorphism groups and the compact-open topology*, Amer. Math. Monthly **112** (2005), 910–912.
53. J. J. Dijkstra and J. van Mill, *A counterexample concerning line-free groups and complete Erdős space*, Proc. Amer. Math. Soc. **134** (2006), 2281–2283.
54. J. J. Dijkstra, *A homogeneous space that is one-dimensional but not cohesive*, Houston J. Math. **32** (2006), 1093–1099.
55. J. J. Dijkstra and J. van Mill, *On the group of homeomorphisms of the real line that map the pseudoboundary onto itself*, Canad. J. Math. **58** (2006), 529–547.
56. J. J. Dijkstra, *An explosion point space without the fixed point property*, Topology Appl. **153** (2006), 2948–2951.
57. M. Abry, J. J. Dijkstra, and J. van Mill, *On one-point connectifications*, Topology Appl. **154** (2007), 725–733.
58. M. Abry and J. J. Dijkstra, *Universal spaces for almost  $n$ -dimensionality*, Proc. Amer. Math. Soc. **135** (2007), 2623–2628.
59. S. Barov and J. J. Dijkstra, *On closed sets with convex projections in Hilbert space*, Fund. Math. **197** (2007), 17–33.
60. J. J. Dijkstra and D. Visser, *On generalized Erdős spaces*, Topology Appl. **155** (2008), 233–251.
61. J. J. Dijkstra, J. van Mill, and K. I. S. Valkenburg, *On nonseparable Erdős spaces*, J. Math. Soc. Japan **60** (2008), 793–818.
62. J. J. Dijkstra, *On compactifications with path connected remainders*, Proc. Amer. Math. Soc. **136** (2008), 4461–4466.
63. S. Barov and J. J. Dijkstra, *On closed sets with convex projections under narrow sets of directions*, Trans. Amer. Math. Soc. **360** (2008), 6525–6543.
64. J. J. Dijkstra and J. van Mill, *Characterizing complete Erdős space*, Canad. J. Math. **61** (2009), 124–140.
65. S. Barov and J. J. Dijkstra, *On closed sets with convex projections under somewhere dense sets of directions*, Proc. Amer. Math. Soc. **137** (2009), 2425–2435.
66. J. J. Dijkstra, *Homogeneity properties with isometries and Lipschitz functions*, Rocky Mtn. J. Math. **40** (2010), 1505–1525.
67. J. J. Dijkstra and D. Visser, *Homeomorphism groups of Sierpiński carpets and Erdős space*, Fund. Math. **207** (2010), 1–19.
68. J. J. Dijkstra and L. Zhang, *The space of Lelek fans in the Cantor fan is homeomorphic to Hilbert space*, J. Math. Soc. Japan **62** (2010), 935–948.
69. J. J. Dijkstra and K. I. S. Valkenburg, *The instability of nonseparable complete Erdős spaces and representations in  $\mathbb{R}$ -trees*, Fund. Math. **207** (2010), 197–210.
70. S. Barov and J. J. Dijkstra, *On closed sets in Hilbert space with convex projections under somewhere dense sets of directions*, J. Topol. Anal. **2** (2010), 123–143.

## LIST OF PUBLICATIONS

71. J. J. Dijkstra and R. Tahri, *Homeomorphism groups and the topologist's sine curve*, Bull. Polish Acad. Sci. Math. **58** (2010), 269–272.
72. J. J. Dijkstra, K. I. S. Valkenburg, and D. Visser, *Nonseparable complete Erdős spaces and submeasures on uncountable cardinals*, Topology Proc. **37** (2011), 481–502.
73. L. Zhang and J. J. Dijkstra, *On the topological structure of spaces of fuzzy compacta*, Fuzzy Sets and Systems **177** (2011), 80–86.
74. J. J. Dijkstra, *Characterizing stable complete Erdős space*, Israel J. Math. **186** (2011), 477–507.
75. J. J. Dijkstra and J. Hickmann, *On the homeomorphism groups of Brechner's continua*, Houston J. Math. (to appear).
76. J. J. Dijkstra and K. I. S. Valkenburg, *Classification of Erdős type subspaces of nonseparable  $\ell^p$ -spaces*, Topology Appl. **159** (2012), 1875–1886.
77. J. J. Dijkstra and J. van Mill, *Negligible sets in Erdős spaces*, Topology Appl. (to appear).
78. J. J. Dijkstra and K. I. S. Valkenburg, *Classifying Erdős type spaces of higher descriptive complexity*, Israel J. Math. (to appear).

### submitted research papers

79. S. Barov, J. J. Dijkstra, and M. van der Meer, *On Cantor sets with shadows of prescribed dimension*.

### survey papers and non-refereed papers

80. J. J. Dijkstra and J. Mogilski, *A geometric approach to the dimension theory of infinite-dimensional spaces*, Proc. Ann. Worksh. Geom. Topology **8** (1991), 59–63.
81. J. J. Dijkstra and J. van Mill, *Topological classification of infinite-dimensional spaces with absorbers*, Recent Progress in General Topology (M. Husek and J. van Mill, eds.), North-Holland, Amsterdam, 1992, pp. 145–165.
