

## readme

- for any chapter – choose either 1, 2, 3, 4, 5, 6 or 7
- for (digital) resources – choose resources
- for printing directives – choose print
- for an explanation of the slide format – choose slides
- and for the rest – make your own choice

**copyright** This material is copyrighted. You may not copy or print any of this material without explicit permission of the author or the publisher.

**formats** The notes are available

- in PDF format
- online in HTML
- as slides in both dynamic HTML and VRML

**slides** Slides are segments or slices of the text that may be displayed independently, or in sequence, with enlarged font. Slides are available both in dynamic HTML/javascript presentation format, as well as in a home-grown VRML format.

**PDF (reading and printing)** Go to the index. and click on PDF. A PDF reader must be installed on your system. Such a reader can be freely obtained at [www.adobe.com](http://www.adobe.com). Alternatively, click on the  sign at the top right for a PDF version of that particular chapter or section.

**online version** Click on , in the topleft of the navigation area, for a contents listing.

**presentation** Click on the *eye*  at the index page, or any of the other pages, for a dynamic HTML version of the slides. See DeJaVU Online (Readers Guide) for an explanation of the navigation options. The principle is simple, click on the right yellow sidebar, until the presentation is finished. For a VRML version, click on the *blaxxun*  sign. These links require the blaxxun Contact 3D plugin. Hit the spacebar to advance in the sequence. The backspace takes you one back.

**trails** This document may contain trails. Qualified trails are indicated with, for example, C: < % ^ >. In this case it concerns a *concepts* trail. The signs indicate respectively:

- < – back, to the previous segment

- % – (toggle) to slide-mode in text, to text in slide-mode
- ^ – up (to the beginning of a chapter or section)
- > – to the next segment

**other links** In resources links to other sites as well as online copies of external material are given.

**CDROM** The CDROM contains the full online version of the course notes. Open the file `index.html` in Netscape Navigator or Microsoft Internet Explorer, and click on *readme* for an explanation or *introduction multimedia* to access the material.

The online version provides you with both an HTML-based presentation format, as well as a VRML-based format, for presenting the lectures in class. The *blaxxun* Contact 3D VRML browser you need for this may be freely obtained from [www.blaxxun.com](http://www.blaxxun.com).
