

Jaap Kaandorp: Now

Teaching interests:

- Scientific computing
- Computational biology

Research interests:

- emergent behavior and pattern formation in complex systems
- computational biology (modeling gene networks)
- Computational geometry

Jaap Kaandorp: then

- Teaching interests:

- Scientific computing
- Computational biology

Research interests:

- emergent behavior and pattern formation in complex systems
- computational biology (modeling gene networks, cell-based modeling)
- Reverse engineering of models of gene networks using stochastic optimization
