

Natalia Silvis: now

- Teaching :
 - Pervasive computing (BA)
 - with focus on systems, signals and algorithms
 - Software testing (MA)
 - with focus on techniques for test generation, execution and evaluation and their applications in industry
- No research tasks (I am lecturer and study-advisor)

Natalia Silvis: then

- Teaching:
 - **Pervasive computing**
Special interests: signal processing and pattern recognition in pervasive computing systems (speech, image and brain signals)
 - **Software testing**
Special interests: new testing techniques and experiments for their validation, bridging “classical” software testing field and security testing, mining bug repositories for prediction
